Author Index to Volume 1

Bates, J. L., 285
Bennett, James S., 49
Bledsoe, W. W., 23
Boyer, Robert S., 17
Buchanan, Bruce G., 28
Bundy, Alan, 263

Constable, R. L., 285

Doyle, Jon, 391

Friedland, Peter E., 161

Green, Cordell, 37

Henschen, Lawrence J., 23, 141, 231
Hong, Robert, 13

Iwasaki, Yumi, 161

Knoblock, T. B., 285

Lengauer, Christian, 75
Lusk, E. L., 103, 209

McCune, William, 231
Mauceri, John G., 357
Moore, J Strother, 17

Ohlbach, H. J., 327, 435
Overbeek, R. A., 103, 209

Pereira, Fernando, 9

Russinoff, David M., 121

Schmidt-Schauss, M., 327
Shankar, N., 407
Stickel, Mark E., 333

Wos, L., 1, 6
Wrightson, Graham, 35

Yahya, Adnan, 141

Subject Index to Volume 1

Artificial intelligence (AI), 5, 391
Assumptions, 141, 391
Automated programming, 5, 37
Automated reasoning (AR), 5, 6, 13, 285
Automated theorem proving, 13, 23, 75
  example for, 327
  for proving Wilson's theorem, 121
  with proof-cheching programs, 407
  with semantic paramodulation, 231
AUTOMATH, 285

Beth's theorem, 391
Boyer-Moore theorem prover, 121, 407

Chaining, forward, 357
Circumscription, 391
Closed world assumption (CWA), 141
Computational logic, 5
Concurrency, 75
Confidence factor, 357

Decision procedures, 285, 333
Deduction
  implicit, 391
  in non-Horn databases, 141
Deductive databases, 141
Definition, implicit, 391
Demodulation, 209
Design, 161

Equality, 231
Equality reasoning, 209
Error correction, 5
Example for automated theorem proving, 327
Experiment design, 161
EXPERT, 357
Expert systems, 28, 49, 263, 357

Formal mathematics, 285
Forward chaining, 357
Frame, 357

Generalized closed world assumption (GCWA), 141

Hierarchical planning, 161
Horn sets, 231

Implicit deduction, 391
Incidence Calculus, 263
Induction, 5
Inference, 263
Inference net, 357
Inference rules, 5, 6, 23, 231
Intelligent robot, 5, 13
Intelligent systems, 285

Knowledge acquisition, 49
Knowledge representation, 5, 6
Knowledge-based software, 5, 49
Knowledge-based systems, 161

Languages, very high level, 5, 37
LCF, 285
Logic, 263
  many-sorted, 327
  mathematical, 407
  predicate, 435
Logic programming, 5, 9

Mathematical logic, 407
Mathematics, formal, 285
Metamathematical extensibility, 407
Metamathematics, 407
Metaplanning, 161
MOLGEN project, 161
ML, 285
Multisensor integration and fusion, 5, 13

Non-Horn databases, 141
Non-Horn problems, 103
Number theory, 121

Object-oriented reasoning, 5, 13

Paramodulation, 209, 231
Predicate calculus, 5, 6
Predicate logic, 435
PRL, 285
Probability, 263
Production system, 357
Program synthesis, 5, 37, 75
Program transformation, 75
Program validation, 75

Program verification, 5, 17
Proof checking, 285, 407

Resolution, 327, 333
Robotics, 5, 13
Robot selection expert, 357
ROGET, 49
ROSE, 357

Semantic inference rules, 231
Set of support strategy, 231
Skeletal plans, 161
SPEX system, 161
Strategy, 5, 6, 231
Synthesis, of programs, 5, 37, 75

Tactic, 285
Tautology theorem, 407
Theorem provers, 121
Theorem proving, automated, *see* Automated theorem proving
Theory resolution, 333
Transformation, of programs, 75

Uncertainty, 283

Validation, of programs, 75
Verification, 5, 17

Wilson's theorem, 121
